SUMMARY

Full-Stack Developer and AI Engineer with 2+ years at Accenture, specializing in cloud infrastructure automation, AI-driven systems, and enterprise full-stack development. Hands-on expertise in RAG pipelines, agentic AI, building and fine-tuning LLMs from scratch, and multi-cloud platforms (AWS, Azure, GCP). AWS and GCP certified.

EXPERIENCE

Packaged App Development Analyst, Accenture, India

June 2026 – Present

- Architect and deploy infrastructure automation platforms and ServiceNow workflows across enterprise client environments, improving operational efficiency and system uptime.
- Design cloud automation solutions using Ansible, Terraform, and Python across AWS, Azure, and GCP to standardize deployments and accelerate DevOps pipelines.
- Lead technical delivery of automation modules that reduce incident response time and streamline change management processes across multiple concurrent client engagements.

Packaged App Development Associate, Accenture, India

August 2024 – May 2026

- Developed full-stack internal applications with Python, Django, ReactJS, and PostgreSQL; integrated Azure OpenAI APIs to automate repetitive cloud operations.
- Containerized services with Docker and Kubernetes on Azure and maintained CI/CD pipelines; built RESTful APIs and microservices powering dashboards and automation across client projects.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Frontend: ReactJS, Next.js, Tailwind CSS, Redux

Backend: Django, FastAPI, Express.js, Node.js, Redis, Celery, Prisma

Databases: PostgreSQL, MongoDB, MySQL, Supabase VectorDB

AI / ML: PyTorch, HuggingFace, Transformers, LLM Fine-Tuning & Alignment, LoRA / PEFT, LangChain, RAG, Agentic AI

Cloud & DevOps: AWS, Azure, GCP, Docker, Kubernetes, Ansible, Terraform, CI/CD, GitOps, Cloudflare Workers

FULL-STACK & INFRASTRUCTURE PROJECTS

AutoSage: AI-Driven Infrastructure Automation Platform | Django, ReactJS, AI & RAG, GCP, Docker | Demo | GitHub 2025–2026

- Designed and shipped a production full-stack AI platform with RAG pipelines and agentic AI workflows to automate cloud infrastructure management; backend built with Django, Redis, and Celery; containerized on GCP with Supabase VectorDB.

SwiftPay: Payment Platform with Microservices | Next.js, Express.js, PostgreSQL, Docker, Kubernetes | Demo | GitHub 2024–2025

- Built a real-time P2P payment application (Next.js, Express.js, PostgreSQL, Prisma) and a separate containerized microservices infrastructure with Docker and Kubernetes for scalable, fault-tolerant deployment.

AI & MACHINE LEARNING PROJECTS

MiniGPT-v3: LLM Post-Training & Alignment Pipeline | PyTorch, SmolLM-135M, LoRA, Fine-Tuning | Demo | GitHub 2026

- Fine-tuned SmolLM-135M through a complete post-training pipeline — Continued Pre-Training (WikiText), Supervised Fine-Tuning (Alpaca), DPO preference alignment (Orca), and RLVR with GRPO for verifiable arithmetic; implemented each stage as a stackable LoRA adapter and deployed on Streamlit.

MiniGPT (v1 → v2): GPT-Style Transformer from Scratch | PyTorch, HuggingFace, GradIO | Demo | GitHub 2026

- Built GPT-style autoregressive transformers from scratch in PyTorch — progressing from a Shakespeare-trained model (v1) to a 6.8M-parameter model (v2) with RMSNorm, SwiGLU, RoPE, GQA, and a custom BPE tokenizer; trained on TinyStories and deployed on Render and HuggingFace Spaces.

CERTIFICATIONS

AWS Certified Cloud Practitioner

Amazon Web Services (Dec 2024 – Dec 2027)

Google Cloud Associate Cloud Engineer

Google Cloud Platform (Jan 2026 – Jan 2029)

EDUCATION

Ravenshaw University

Cuttack, Odisha, India

B.Sc. in Information Technology & Management | **Grade: 87.13%**

2021 – 2024

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Web Technologies, Cloud Computing, Software Engineering
